With a money-saving benefit for members taking specialty medications

Copay Assistance Program

SaveOnSP is a specialty drug coupon program for HAP members (see eligibility criteria below) that focuses on maximizing the assistance available from drug manufacturers to lower member cost for specified prescriptions.

SaveOnSP Program Overview

The SaveOnSP program is intended to reduce the rising trend of specialty pharmacy drugs. The unique program utilizes benefit design and manufacturer copay assistance to achieve these goals. Drugs included in the SaveOnSP program are impacted as follows:

- By designating a select list of specialty medications as Non-essential Health Benefits, these products are removed from out-of-pocket maximums and not applied to out-of-pocket accumulators or deductibles.
- Members will continue to fill medications at the same pharmacy (Pharmacy Advantage or designated specialty pharmacy for most HAP specialty drugs).
- Specialty drugs that are not included in the SaveOnSP program will continue to process as before with the plan's current cost-share for the medication.
- If a member chooses not to participate with SaveOnSP, the prescription drug coinsurance will be 30% of the cost of the drug. The coinsurance will not count towards the deductible or out-of-pocket maximums, in accordance with the Affordable Care Act (ACA).

Program Features

- The SaveOnSP program will reduce the members out of pocket to \$0 for identified specialty drugs.
- The program will typically impact **less than 2% of membership**.
- Medicare and Medicaid Eligible Members are ineligible to participate in the SaveOnSP program.
- Members with prior authorization for an approved SaveOnSP drug can be enrolled in the program at the time of their first prescription dispensing event.

Member Eligibility Criteria

- Specified large employer groups participating effective 4/1/23 and thereafter
- Qualified health plan (QHP) members effective 1/1/24 and thereafter
